Sash Window

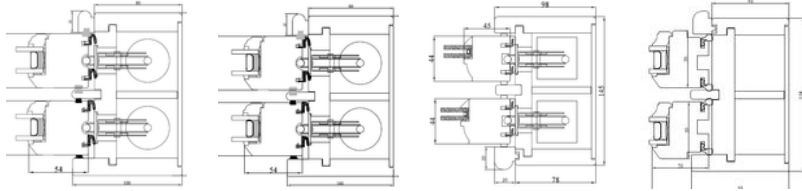

*Hardware & Fittings*

# Sash Window Ironmongery & Fittings

From quaint cottages to stately manors, Sash Window Shop offers an unrivaled selection of sash windows across Britain. Our diverse range ensures seamless replacements that honor architectural integrity, whatever your property's style or era.

Our Sash Box comes in four depths, with our standard at 150mm and our Slim Heritage Sash at 134mm. This option is the UK's slimmest traditional sash window. It fits original plaster lines without jutting into the room. It has 8.3mm vacuum glazing units. They are two 4mm glass sheets with a 0.3mm interlayer. Advanced vacuum technology gives them the same insulation as triple glazing.

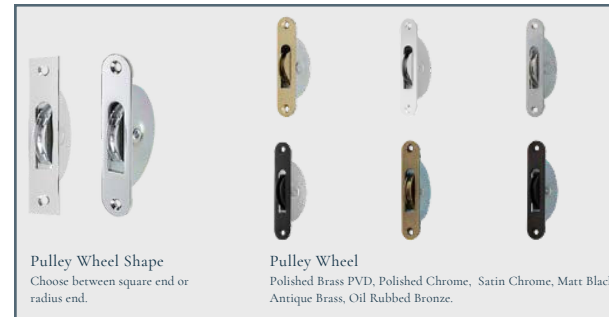

The standard Replacement Box Sash may extend into the room.

The Slim Heritage Box Sash typically aligns flush with the plasterwork.

## Sash Operation

### WEIGHTS & CORDS

We can also attach traditional sash cord with weights to our sashes. The cord is pre-stretched to support the weight of double glazed units.

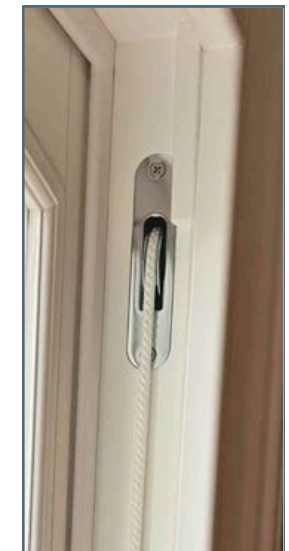

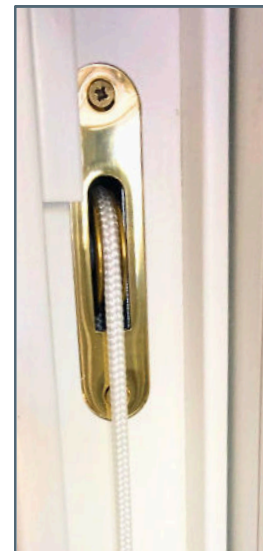

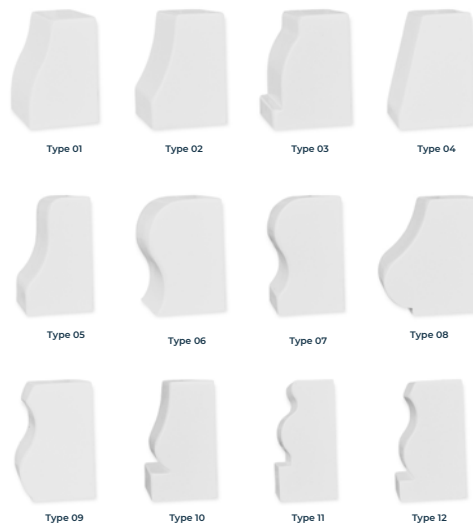

## Sash Horns

We offer decorative sash horns on the bottom of the top sash outside. They can also go on the top of the lower sash inside.

### SASH HORN OPTIONS

**SPRING SYSTEM**

Modern buildings often lack the rebate for traditional sash boxes, but spring balances offer a solution. Available in visible or hidden varieties, providing flexibility for contemporary window designs while maintaining the classic sash functionality.

**SPRING BALANCE OPTIONS**

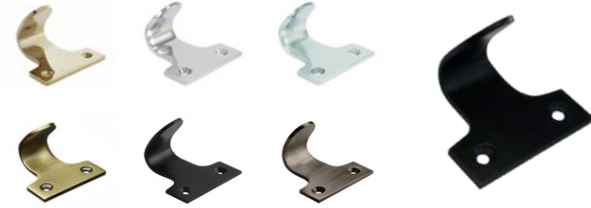

Visible and hidden spring balances offer different aesthetic and functional benefits for sash windows. Visible balances, available in white, brown, grey, and cream, add a subtle design element and are easier to maintain. Hidden balances, also in these colors, are concealed within the frame, providing a clean, uninterrupted look while maintaining functionality.
